

## “Greening the City”

Desso artificial turf only on sports fields? Not any more. Responding to the increasing demand for evergreen lawns, Desso Sports Systems has introduced Desso BuenaVista artificial grass: the new product range for municipal green areas and private use. With BuenaVista, you can create an attractive cityscape, a garden that's easy to maintain, or a stylish roof patio in a flash.

Many cities and towns have seen the advantage of using artificial grass to make their streets more attractive. The possibilities are endless: town squares, parks, playgrounds, grass along roadways and tramlines, roundabouts, airports, industrial estates... Not only does public space get a permanent appearance, but maintenance costs are reduced significantly, too. No mowing is required, no watering during hot weather, and no pesticides either.

The Desso BuenaVista products are also of interest for private homes. The grass has the appearance of a perfectly maintained lawn, in all seasons, and solves the problem of shady corners and areas around swimming pools...in fact all the places where natural grass grows poorly, if at all. Desso BuenaVista gives roof patio areas an instant uplift and creates the perfect low maintenance garden for those who like a garden, but either do not have the time, or are not able to maintain it.

### Adds colour to your surroundings

- urban renewal, even in places where grass doesn't grow
- not affected by weather or season (winter and summer, the look is the same)
- unique impact on the surroundings: logos, colour combinations, ...

### Instant overhaul

- installation is fast & easy on all types of surfaces
- an immediate & lasting green result
- limited maintenance vs. natural grass

### Durable and environmentally friendly investment

- no water consumption
- no use of pesticides or fertilizers
- still looks good after years of use and no mowing required
- recyclable
